

Appendix E16: Confirmation of service provision

1. Electricity

Electricity supply to the proposed development will be established via extension of existing electrical infrastructure. Please refer to communication with Eskom provided in Annexure E16A below as well as the services plan provided in Appendix B3. Electricity supply will likely be supplemented via generators.

2. Water

The water required for the proposed development is available from within the existing approved water use allocations for the property. The property, which has been under cultivation for several decades, holds verified water abstraction and storage rights (refer to Annexure E16B below). A portion of the farm previously used for irrigation has been repurposed for the development of the existing poultry rearing facility. This shift in use ensures that the overall water consumption remains balanced and within the approved volumes. As such, sufficient water is available for the development without increasing total usage. The water that will sustain the new proposed chicken facility is registered under water use number 5 in water use register number 29017625, extract attached in Annexure E16B below.

3. Sewage

A septic tank system will be installed at the proposed development site as no wastewater treatment works is located nearby.

4. Poultry Facility Waste

Manure will be managed by directing a portion to the registered onsite composting facility. The remainder will be used directly in the agricultural industry. High-pressure wash water will be used to clean the chicken houses, with any residual water lost through evaporation

Non-infectious mortalities will be disposed of via the registered onsite composting facility. The Applicant confirmed that there is sufficient composting capacity on the farm to accommodate the expected mortalities.

Annexure E16A – Eskom Capacity

Subject: Project CDC745944598, Increase of supply

Hello

With reference to your application for increase of supply from 150 to 200 kVa at the Grootvlei pivot point, the following.

The existing transformer and meter box is already 200kVa, therefore no work will be done in the field, but it will only be paperwork.

The required information was forwarded to our Customer Service Department, and they will issue the quotation in due course.

All further communication in this regard must be with Customer Services.

Regards

Matthys Groenewald

DISCLAIMER :

This Registration Record:

- 1 is not an acknowledgement of an entitlement to the registered water use;
- 2 may NOT be used to create the impression that it is proof of a water use entitlement. By virtue of section 22(1) of the National Water Act, the only documents that may be used as proof of a water use entitlement, are:
 - 2.1 a licence;
 - 2.2 an official document stating the extent of existing lawful water use pursuant to sections 33 or 35 of the National Water Act;
 - 2.3 a general authorisation as published in the Gazette; or
 - 2.4 Schedule 1 of the National Water Act.

Notes:

- If an entitlement for the specific water use referred to in this Registration Record has been confirmed by the Department, it may be indicated as such in this Registration Record.
 - If the responsible authority has dispensed with the requirement for a licence for a specific water use, no water use entitlement is needed for that use under the National Water Act.
- 3 is issued without alterations or erasures and is invalid if it contains alterations not in conformity with the Department's official copy; and in substitution of any Registration Record the Department may have previously issued and the information is valid as at the date of issue.
